

Sage X3 Developer

The Role

Exciting opportunity for an ambitious, driven Sage X3 developer to work for one of the UK's leading Sage X3 Business partners. This role will be responsible for designing and developing solutions to customer requirements from concept through to testing and completion. This role is "hands-on", with a reporting line to the Customer Service Manager and daily interaction with colleagues in the various teams. There is also a requirement to assist the Support team on customer support issues subject to workload.

Skills & Experience

The ideal candidate would have a proven track record in a similar role with a Sage Business Partner or Sage themselves. Knowledge and experience of the Sage X3 4 GL language and of Eclipse IDE is a requirement.

Who we are looking for

The Sage X3 Developer will be someone with the ability to:

- Communicate clearly and effectively.
- Be self-motivating and be able to work under your own initiative.
- Be an effective member of a small team.
- Work effectively from home as a remote worker.

The successful candidate will have an approach to work that is flexible with a keen interest in developing their skills. Note: applications from candidates without the required Sage X3 knowledge and experience, or equivalent, will not be progressed.

Location

This is a home-based role. Location is not necessarily important although preference will be given to UK based applicants (with full, existing, eligibility to work in the UK).

Remuneration

Salary to be commensurate with experience.

We offer competitive salaries to attract and retain the highest calibre of individual, and our package, following successful completion of the probationary period, includes private health insurance, contributory pension scheme, mileage allowance and a share in the company bonus scheme.

About Us
