

As a company involved in the sale, supply and service of **'stock'**, we know that you have unique requirements for a software solution – that are just not covered by an 'accounting package'.

You need something with **'stock'** at its **heart and visibility** of many of these aspects:

- The **right stock** at the **right time** to service your customers. Have the ability to service your customers with the efficiency they would expect.
- **Additional stock** - *supplementary, alternative or complementary items* - to ensure that your customers fulfil all their requirements with YOU rather than your competitors?
- Is your **slower moving stock** identifiable and your warehouse turning optimally? Highlight areas requiring attention to stay ahead of the game.
- Do you have simple and robust mechanisms to provide **stock** direct from the supplier and cope with **queries and returns**? Set your business processes to maximise efficiency and meet customer requirements.

**Sage Enterprise Management** is designed to manage all aspects of organisations revolving around stock - along with **all** other business areas that need managing.

## FULL AND SECURE TRACEABILITY OF STOCK

- Multiple location management & bin control.
- Stock management by: physical location, lot (batch) and sub-lot, quality status, serial numbers, expiration dates etc.
- Consigned inventory and third party inventory.
- Inventory balances by stock status.
- Warehouse management & physical counting.
- Inventory replenishment.
- Inter and Intra-company movements.
- Forward and backward traceability.
- Variety of inventory costing methods.

**"WE HAVE REQUESTS FOR INFORMATION FROM OUR CORPORATE CUSTOMERS IN RESPECT OF THEIR CONSIGNMENT STOCK ON VIRTUALLY A DAILY BASIS, EVERY ONE IS DIFFERENT. SAGE ENTERPRISE MANAGEMENT WILL GIVE US THE RIGHT LEVEL OF INFORMATION, AVAILABLE ON-DEMAND."**

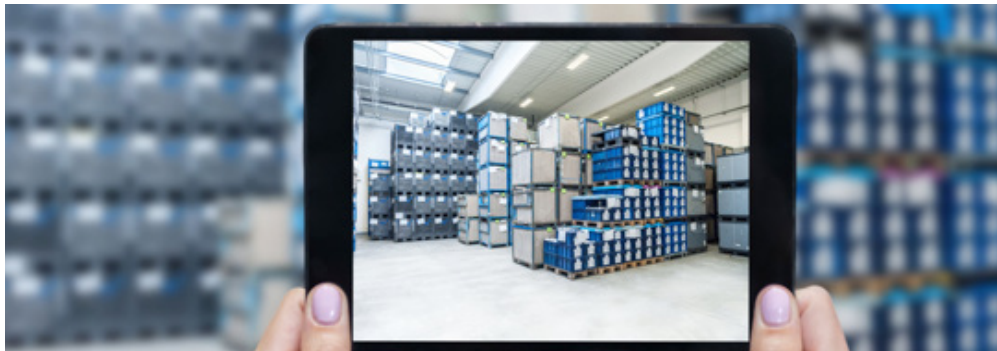

Stuart Bettington  
Finance Director  
TXO Systems

**INTEGRATED STOCK, PURCHASING & SALES**

Fully integrated stock, sales and purchasing – back to back functionality, linked, blanket, call off orders – efficient, customisable management controlled with embedded workflow.

The strength of Sage Enterprise Management lies in its ability to really optimise your operations, which includes inventory management coupled with sales-force management, customer support, after sales service, inter-site & inter-company

transactions, sub-contract and project management.

**AUTOMATE AND ADAPT**

Designed to help businesses increase agility, responsiveness and productivity, Sage Enterprise Management is characterised by its ability to automate any type of process and adapt quickly to all kinds of situations.

Sage Enterprise Management is key to improving enterprise flexibility: modular and flexible structure can be adapted to suit all kinds of organisations.

With configurable Sage Visual Processes, Sage Enterprise Management makes it easy to implement new procedures for each role within the company.
