

With competition and economic climate pressures ever increasing, the requirements of the company accounting function have moved beyond accounts receivable, payable and general ledgers. Now the 'finance' function can provide real-time information, reporting and analysis to enable businesses to react quickly to changing factors.

Sage Enterprise Management is designed to manage all aspects of businesses revolving around financial management - along with all other areas that need managing.

## **AUTOMATE AND ADAPT**

Designed to help businesses increase agility, responsiveness and productivity, Sage Enterprise Management is characterised by its ability to automate any type of process and adapt quickly to all kinds of situations.

Sage Enterprise Management is key to improving enterprise flexibility: modular and flexible structure can be adapted to suit all kinds of organisations.

With configurable Sage Visual Processes, Sage Enterprise Management makes it easy to implement new procedures for each role within the company.

*"The consolidation of the three computer systems at Spotless Punch was a critical part of our strategy, and it was essential that it happened with minimal impact on our Customers and Suppliers. The team at Inixion managed the entire project and delivered everything with a methodical and detailed approach."*

Jason Keeley, Chief Financial Officer, Spotless Punch

**“MANY THANKS TO INIXION FOR THE INSTRUCTION, GUIDANCE AND SUPPORT IN MAKING THE SAGE ENTERPRISE MANAGEMENT IMPLEMENTATION AT BELZONA A RESOUNDING SUCCESS. FROM DAY ONE OUR USERS WERE FINDING SAGE ENTERPRISE MANAGEMENT MUCH MORE INTUITIVE AND SIMPLER TO USE.”**

Neil Robinson, Administrative Director, Belzona

**MULTI COMPANY**

Multi-site and multi-company operations are handled with ease within the same database allowing for flexible consolidation and reporting. Differing fiscal legislation between countries is accommodated without compromising the overall structure of a true corporate setup.

**MULTI CURRENCY**

Buy in Dollars, sell in Euro's, report in Sterling and produce consolidated accounts in Yen? Sage Enterprise Management does not constrict any transaction to a particular currency with full reporting, exchange rate control and full Intrastat reporting.

**FULL AUDIT TRAIL AND LOGGING**

Full traceability of all transactions from source entry down to journal level is embedded throughout the entire system. This provides not just a log but an auditable trail of all changes: user, date and time stamped.

**BUDGETING AND FORECASTING**

Keeping a close eye on the budget is one thing – with real-time analysis against actuals, Sage Enterprise Management provides exceptional financial management control for your budgets. Budgets are fully integrated into Supply Chain processes, enabling full procurement monitoring against Budget. Multiple budgets and forecasts can be managed.

**INIXION**
